Information

The two-year post-graduate degree in Management of Human Resources and Labour Studies - MLS aims at developing a world-class education path to train professionals in the analysis, setting up and implementation of welfare and labour policies, the strategies of employment relationships management and of diversity management within organizations. This course belongs to the Labour Studies area, where study, research and teaching are based on a multi-disciplinary approach to labour issues. It therefore aims at being a world-class education path where the different approaches – law, economics, sociology, politics, statistics-methodology, organizational psychology – are well balanced and combined with the issue of labour promotion and management policies. The course is also a learning path open to international comparison, and as part of the European network of the European Master in Labour Studies, it promotes exchanges with similar courses in other European universities and offers a curriculum where specific modules are held in English.

14.3 - Economics

Mobility

2 - Master

Location

University of Milan, Italy

Subject

Economics and Political Science (ECONOMIC ANALYSIS AND POLICY; POLITICS, PHILOSOPHY AND PUBLIC POLICY)

Course/Program

Master in Economics and Political Science - EPS (Faculty of Economics, Social Political Sciences)

Language requirements

English. TOEFL minimum score 213/550 IELTS minimum score 6.0

Academic requirements

The programme is intended for top level international students. About 40 students are expected to enrol each year, which will guarantee an optimal ratio between instructors and students. Applicants must have a bachelor's degree and must be enrolled in a Master course at their Home University; a strong interest and/or previous studies in economics, political science or related subjects; undergrad. or graduate training in mathematics and quantitative methods or a strong motivation to quickly fill their gaps in these fields. Successful applicants will be enrolled as non-degree seeking students.

Information

The MA aims at developing a highly qualified learning track in the fields of economics and political science, and rests on the assumptions that both economics and political science stem from moral and political philosophy. While drawing their origin and inspiration from this common matrix, the two fields have developed autonomous epistemological statutes, to which distinct conceptual frameworks correspond, even while preserving their tight relationship. Over the last two centuries increased public intervention in the economic sphere in all types of socio-economic systems has drawn the two disciplines closer. In present-day research activity one can find countless instances of theoretical and empirical investigations where the boundaries between the two sciences become blurred and the tools and methods of analysis turn out to be essentially the same. The programme tackles these issues, and is organised in two distinct curricula each focusing on specific aspects of the economics/politics binomial concept.

http://www.facoltaspes.unimi.it/CorsiDiLaurea/2015/B67of2/index_ITA_HTML.html

Duration

10 months between Sep 23 2015 and July 22 2016

Additional information

The MA aims at providing its students with advanced training in both economics and political science, comparable to that offered by leading international MAs in each of the two disciplines. EPS graduates will not only be endowed with high-level analytical and operational skills, but they will also be characterised by an open and critical vision of economic, political and social issues, and a cultural depth hardly achievable by attending a programme centred on a single or prevailing disciplinary field. They will reach highly qualified theoretical and applied knowledge and skills in the following fields: mathematics, probability and statistics, with applications to economic, political and social sciences; econometrics; microeconomics; macroeconomics; economic policy; public economics; welfare economics; history of economic analysis; epistemology of the social sciences; political philosophy; political theory; decision theory; game theory; social and political choice theory; theory of justice.

2

Information

The discrepancy between institutional and policy designs and their outcomes is a major political issue at national and international level. Moving from design to implementation involves the emergence of unforeseen and occasionally perverse effects, of state and market failures, of value systems uncertainty and of conflicts at the boundary between public and private. By training highly-skilled professionals with appropriate planning and implementation expertise advanced democracies try to address these issues. The aims of the doctoral program are: • to train professionals who can undertake research within academic institutions and research centers, and provide consultancy for political, economic, public or private organizations in both national and international spheres; • to offer the most up-to-date knowledge and methods in the field of political science and political philosophy required to analyze complex institutions and organizational processes and to understand and address the ethical dilemmas involved

Information

The Ph.D. program in Sociology has a longstanding tradition of excellence in Italy. It was one of the first to be established after the 1980 university reform and has provided a large number of outstanding academic sociologists who have gone on to make significant contributions to teaching and research in Italy and abroad. The aim of the program is to provide structured training in theoretically-guided empirical research across a wide range of sociological fields and to introduce students to current international debates in both qualitative and quantitative social research. Graduates are able to compete successfully for positions as researchers (in public and private universities and research centres), skilled professionals and consultants in sociology to public agencies and international organizations and institutions in Italy and elsewhere in Europe.

Information

The Faculty of Economics, Social and Political Science of the University of Milan is an educational institution which offers complete academic training across the entire range of social science subject areas. The programmes on offer are: 7 three year undergraduate courses and 10 post-graduate courses, including 1 interfaculty degree with the Faculty of Literature and Philosophy and the Faculty of Medicine and 1 inter-university degree together with 3 overseas universities. These courses can be broadly divided into three main groups: the first group takes a multi-disciplinary approach (Political Science, International Relations, Organisational Studies, Communications Studies), the second are based on a single subject area (Economics, Sociology) while the third group are interfaculty or inter-university courses (European Studies, Cognitive Science).
